

COMMERCIAL

AIRCON

WHERE PERFECTION HAS A NAME

ABOUT US

Company started in 1997 in name of Baweja Airconditioning Services.
In 2009 it was renamed as Commercial AirCon

OUR MISSION

To provide “Turnkey Solution” for HVAC. Our aim is to provide designing, Consultation,, installing, commissioning, and validating all classes of cleanrooms and has been rated top most turnkey service providers for Schools, Colleges, Offices, Franchises, Malls, Restaurant, Showroom, Healthcare, etc We are a one-stop solution provider for HVAC

OUR VISION

Our personal goal and promise to you is to provide you We are providing complete solution for HVAC for Hotels, Restaurants, Office Spaces, Institutes, Hospital & Industrials projects. We are specialized in providing DSW Water Cool Ductable, Cooling Tower, AHU Installation & services.

COMPANY DETAILS

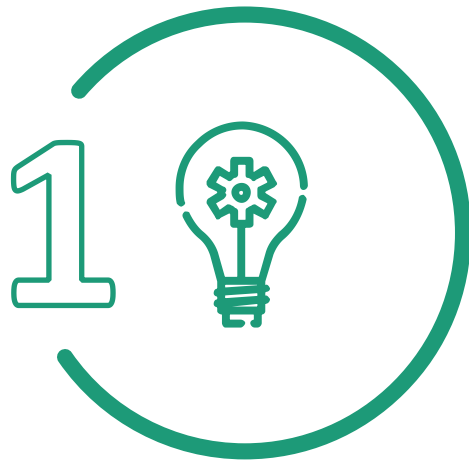

COMPANY NAME : COMMERCIAL AIRCON
OWNER NAME : MR. DEEPAK BAWEJA
CONTACT NUMBER : 9873340834
PAN NUMBER : APAPD8399E
GST NUMBER : 06APAPD8399E1ZV
ESIC NUMBER : 13000846640000999
PF CODE: HRFBD1753332000
EMAIL ID : commercialaircon@yahoo.in
WEBSITE : www.commercialaircon.com
HEAD OFFICE : 216, 2ND FLOOR, SHUBHAM TOWER, NEELAM BATA ROAD, NEAR FORTIS HOSPITAL, FARIDABAD-121001
GURGAON OFFICE : 68/84, OPPOSITE DELHI PUBLIC SCHOOL, SECTOR-84, GURGAON
NOIDA OFFICE : 612, 6th FLOOR, SPECTRUM METRO MALL, SECTOR-75, UP-201307
NOIDA OFFICE : B1, PARAS MALL, SETOR-133, NOIDA-201304
NOIDA OFFICE : F 28 E, FIRST FLOOR, GALAXY BLUE, SAPPHIRE PLAZA, NOIDA
GURGAON OFFICE : UNIT : SH/G/068, NEWTON SQUARE, SECTOR-95A, GURGAON, HARYANA
NOIDA OFFICE : SHOP NO FF_10, 1ST FLOOR, GAUR CITY, CENTER NEAR CHAR MURTI CHOWK, GREATER NOIDA WEST, GAUTAM BUDH NAGAR, UTTAR PRADESH - 201301

AUTHORISED SALES & SERVICE DEALER OF BLUE STAR

OUR BUSINESS PROCESS

DESIGN

After inspection of your premises, We took a overview and make complete design suitable to your workspace.

SALES

In our sales segment, we deal in HVAC sector. We provide everything in this sector

INSTALL

After Designing part & sales, our team do installation. Our each team member has almost 10 year experience in this industry.

SERVICE

For services, we have very expericed team, that handles each and every thing very carefully

OUR TEAM

NAME	DESIGNATION	EXPERIENCE
MR. DEEPAK BAWEJA	MD	25 YEAR
MR. SANDEEP BAWEJA	CEO	22 YEAR
MR. SAHIB SACHDEVA	PROJECT MANAGER	3 YEAR
MR. SANJAY MALIK	PROJECT MANAGER	18 YEAR
MR. SANTOSH KUMAR	HR HEAD	8 YEAR

MR. SONAUR RAHMAN	HELPER	3 YEAR
MR. SUJAHAD	ENGINEER VRF INSTALLATION	8 YEAR
MR. TALIB	ENGINEER VRF INSTALLATION	12 YEAR
MR. AMIR HUSSAIN	SUPERVISOR	10 YEAR
MR. MD FAIYAZ	HELPER	2 YEAR

PRODUCTS WE DEAL

CHILLER

A chiller (cooling water circulation device) is a general term for a device that controls the temperature by circulating a liquid such as water or heat medium as a cooling liquid whose temperature was adjusted by the refrigerant cycle. In addition to maintaining the temperature of various industrial devices and laboratory instruments, equipment and apparatuses at a constant level, it is also used for air conditioning in buildings and factories. It is referred to as a “chiller” because it is often used for cooling.

Types of chillers

- Air-cooled chiller
- Water-cooled chiller

COOLING TOWER

Cooling Tower systems are often vital to industrial processes. These tall, open-topped, cylindrical structures are responsible for cooling water generated from industrial or HVAC comfort cooling airflow. The different types of cooling towers are identified by the classification of the draft (natural or mechanical) and by the direction of airflow (counter or cross).

- Natural Draft Cooling Tower Systems
- Mechanical Draft Cooling Tower Systems
- Crossflow Cooling Tower Systems
- Counterflow Cooling Tower Systems
- Induced Draft Cooling Tower Systems
- Forced Draft Cooling Tower Systems

AHU(AIR HANDLING UNITS)

Air Handling Unit is a device used to regulate and circulate air as part of a heating, ventilating, and air-conditioning (HVAC) system. An air handler is usually a large metal box containing a blower, heating or cooling elements, filter racks or chambers, sound attenuators, and dampers. Air handlers usually connect to a ductwork ventilation system that distributes the conditioned air through the building and returns it to the AHU. Sometimes AHUs discharge (supply) and admit (return) air directly to and from the space served without ductwork

DSW (WATER COOLED DUCTABLE UNITS)

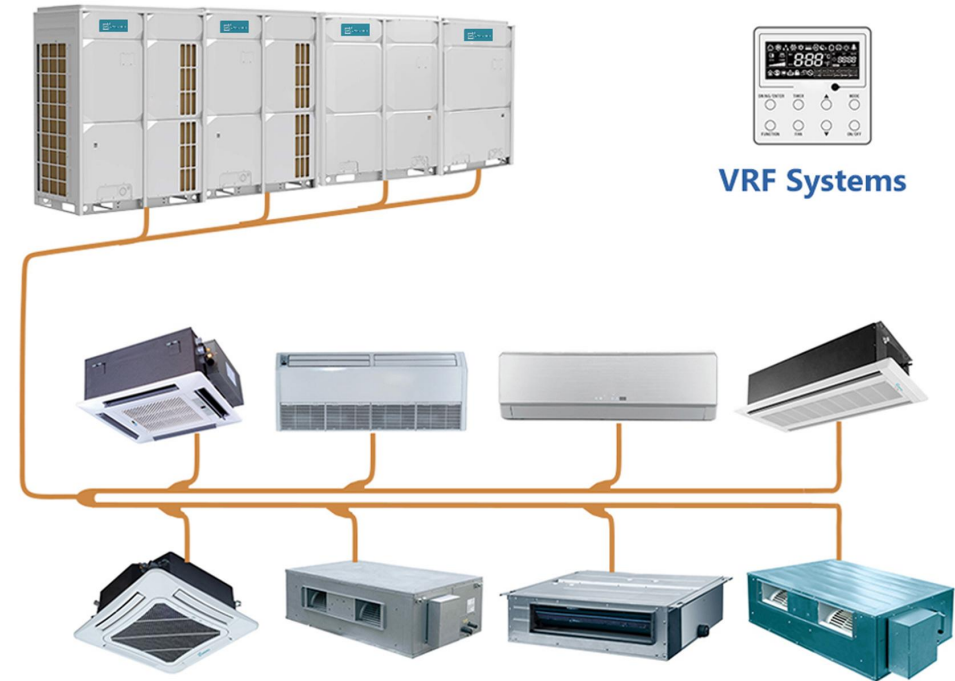

Water Cooled Ductable Unit offered is backed by latest technology support and as intelligent systems they successfully meet the demands of handling total cooling requirements. Some of the areas these find use in include offices, departmental stores, multiplexes, residences, computer rooms, hospitals, conference halls, factories and others. We can offer these units in options of air-cooled and water-cooled working as demanded by the customers.

VRF/VRV

VRF stands for variable refrigerant flow, which goes a surprisingly long way toward describing how this system uses refrigerant for both air conditioning and heating. In a nutshell, VRF is a ductless, large-scale system for HVAC that performs at a high capacity.

Unlike split AC equipment, VRF allows multiple indoor units to run on the same system, which is designed differently depending on the application. VRF systems are considered either a heat pump system or a heat recovery system, which can heat and cool simultaneously.

DUCTABLE UNITS

Explore the most comprehensive range of Ducted air conditioning systems at Commercial AirCon. They are perfect for homes, open-plan offices, shops, schools, restaurants and any other big-size spaces that require balanced air distribution around the room. The most practical choice for heating or cooling large air conditioning remains a challenge

We had started our work of Maintenance, Assembling of Unit Works, Repairing & Services of Refrigeration and Air conditioners.

FLOOR STANDING UNITS(TOWER A/C)

Tower ACs are slowly gaining prominence in the Indian AC market. The working principle of these ACs is just like other conventional ACs like Window AC or Split AC. These Tower ACs come with a much higher capacity than any other AC and are a lot more portable. Compared to other types of air cooling systems, tower ACs are the best electronic devices for climatic control. These appliances provide cooling on a very large scale and are the best alternative for a central cooling system.

PACKAGE A/C UNIT

With growing urbanization, as the number of residential and commercial construction is on the rise globally, and there is rapid urban and economic growth in several countries, packaged airconditioners are making a place for themselves. Their demand is expected to grow considerably over the next five years.

Types of Packaged Units

Just like central AC systems, there are a variety of different types of packaged systems.

- Packaged Air Conditioner
- Packaged Dual-Fuel
- Packaged Heat Pumps
- Packaged Gas-Electric

ET UNITS

Commercial AirCon offers the most comprehensive range of air conditioning products in the country. A wide range of models is available in each product category to ensure that the air conditioning system design is implemented without any compromise. All products have been designed on the energy-efficiency platform, and offer a host of advanced features.

We are offering a wide range of Enclosed Type Unit. Sourced from the reliable vendors of the market, the provided unit is manufactured utilizing the quality assured components and innovative techniques. Available in perfect options all these products are extensively used and offer complete satisfaction to valued clients. Experts use optimum quality input for the designing of all these products.

CASSETTE A/C UNITS

CASSETTE A/C UNITS are widespread and are used for air conditioning of offices, shops, and hotels. They are often preferred in new buildings because of their high energy efficiency and good price. They can be installed in various rooms such as apartments and offices. Installation is most often on the ceiling and makes them especially suitable if you have a suspended ceiling, as there is enough space for installation.

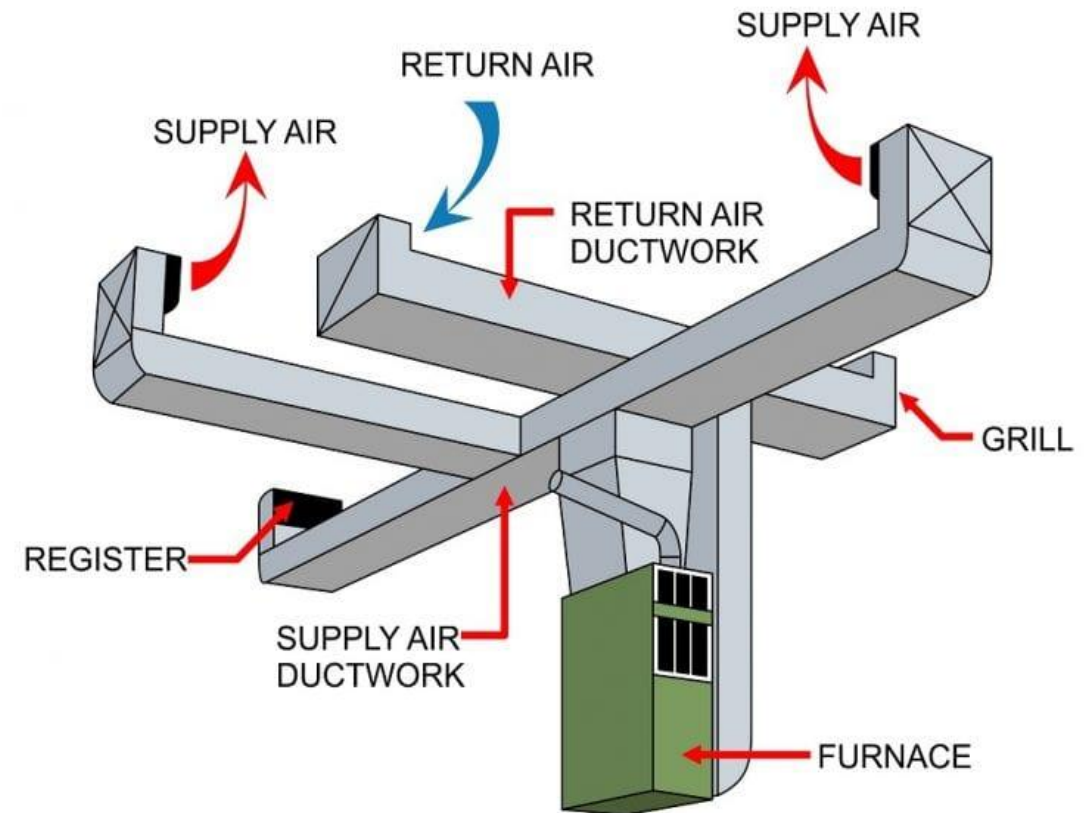

- Provide Healthy Air in a Large Space
- Real-Time Air Quality Monitoring
- Convenient Attachment and Detachment
- Human Detection Technology
- Humidity Sensing Technology

AIR DUCT

Air ducts, or HVAC ductwork, or AC ducts, are conduits that supply warm or cool air to heat, ventilate, and cool each room. Air ducts are connected to the HVAC unit which filters then heats or cools your home's air before sending it off. Air ducts are a vital part of your HVAC system, providing thermal well-being and good indoor air quality.

In HVAC systems, your air goes through a cycle. A negative pressure in the ducts sucks the air in, passing it through a filter. The cleaned air is heated or cooled and sent back to the areas of your house where it stays until it's cycled again.

WE USED FOR DUCTING : GI

- It stands for Galvanized iron.
- This material is most commonly used in fabrication.
- It is cheaper.
- All the shapes of ducting can be fabricated with GI material.

TYPES OF AIR DUCT

Rectangular Duct

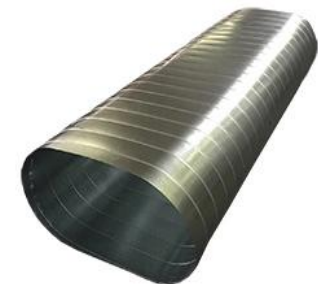

Round Duct

Square duct

Oval Duct

AIR SCRUBBER

An air scrubber is a device that attaches directly to the ductwork of your HVAC system. Air scrubbers are devices designed for cleaning the air in larger areas and are used for more severe pollution in an indoor space. These portable filtration systems are used both for industrial and residential purposes. Although they are considered commercial and industrial air scrubbers for removing toxic particles, chemicals, and gasses from the air, some people use them inside their homes as well. They clean the air by removing the pollution in an area up to thousands of square feet. This pollution is usually caused by remodeling projects, renovations, constructions, etc.

AIR WASHER

An air washer is a hybrid appliance, a combination of an air purifier and a humidifier. Like conventional humidifiers, air washers add therapeutic moisture to the air. And, like a conventional air purifier, an air washer removes symptom-triggering allergens from the air. Therefore, they are capable of soothing your uncomfortable dry air symptoms and easing your allergies. They're ideal for you if you suffer from light to moderate allergies or you just want to improve your indoor air quality in the wintertime. You might also consider using one year-round if you live in a dry climate.

SERVICES WE OFFER

CMC: COMPREHENSIVE MAINTENANCE CONTRACT

CMC contract include one year warranty for air-conditions, electric parts, gas charging & compressor with four times service & complaint.

- Four routine services
- Immediate attendance of breakdown, if any.
- Refrigerant gas charging, if necessary
- Compressor
- Fan Motor
- P.C.B.
- Condenser & Evaporator Coils

EXTRA CHARGES EXCLUDES:

- Plastic Items
- Air filter
- Voltage Stabilizers & Scanners
- Circuit breaker

AMC: ANNUAL MAINTENANCE CONTRACT

AMC contract include one year and four time services & complaint. Non Comprehensive AMC Includes

- Four routine services.
- Immediate attendance of breakdown, if any.
- Refrigerant gas charging
- Fan Motor
- Magnetic Switch
- P.C.B.
- Transformer

EXTRA CHARGES EXCLUDES:

- Plastic Items
- Air filter
- Remote Control
- Compressor
- Condenser & Evaporator Coils
- Circuit breaker

EXTRA CHARGES:

No Warranty for Air-condition's Electric Part, Compressor, plastic Part & Aluminium coil.

TESTIMONIALS

PROJECTS DONE WITH

With the blessings and our enthusiastic team, we have completed 1000+ projects with brands, companies, franchies etc and still running.

OUR SATISFIED CLIENTS

In the past 25 years, we gave our services to thousands of companies, colleges, schools, offices, brands, malls, franchies etc

OUR SITES

We provide our services to newly and already constructed sites, we are leading HVAC services provider in India
